xander.bshr@gmail.com

I am not comfortable with settling, and I'm always looking for an opportunity to do better and find creative solutions.

EXPERIENCE IN:

UI/UX

Mobile Designs with Adobe XD, Prototyping, and making basic UI screens for iPhones.

Front-end Development

Responsive Websites, Connecting with APIs, Making React Apps, Designing front end for apps, and Version Control with Git and VSCode.

Graphic Design

Photoshop, Illustrator, Adobe XD, Adobe Premiere (Video Editing), Poster Design, Book/Album Cover Design, T-Shirt Designs.

EDUCATION

Kennesaw Mountain High School, Georgia — *HS Diploma*

AUGUST 2014 - MAY 2018

PROJECTS

Restaurant Site — *HTML/CSS*

I created a responsive site for a fake waffle restaurant called Waffle World. I used basic HTML and CSS to create the UI of this website. I also used media queries to make sure this website runs correctly on any device.

Lyric App— *React*

I made a lyric search app using React and React Router. This app uses the musix match api. It displays the top ten songs at the moment with their lyrics. It also allows the user to search for a song of their choice and display their lyrics.

Portfolio

Technologies I Use:

HTML, CSS, JavaScript, jQuery, Bootstrap/ Material Design, React js, Node js, Adobe XD, Photoshop, Illustrator, and Adobe Premiere.

Weather App— *Async JavaScript*

I made a weather app using basic Javascript and AJAX. I used the open weather map API. This app allows the user to search for a city anywhere in the world. It displays the temperature, weather forecast, and the high and low temperatures for the day.

Mobile Number Game— *React Native*

I created a quick number guessing game in React Native. This app allows the user to pick a number from 1 to 100. Then, the computer will try to guess the number. I used Xcode and expo for the iOS simulator.
